

SALE OF GOVERNMENT PUBLICATIONS.

The under-mentioned Firms have been appointed sole Agents for the sale of Government Publications, including Parliamentary Reports and Papers, Acts of Parliament, Record Office Publications, &c., &c. (with the undermentioned exceptions), and all such works can be purchased from them either directly or through retail Booksellers, who, as well as the accredited Agents of Free Public Libraries, are entitled to a discount of 25 per cent. from the published prices:—

IN ENGLAND:—WYMAN & SONS, LTD., Fetter Lane, E.C.

IN SCOTLAND:—OLIVER & BOYD, Tweeddale Court, Edinburgh.

IN IRELAND:—E. PONSONBY, LTD., 116 Grafton Street, Dublin.

Hydrographical Works of the Admiralty are sold by Mr. J. D. POTTER, 145 Minories, E.C.

Patent Office Publications are sold at the Patent Office. (Classified Abridgments of Patent Specifications are sold also by Wyman & Sons, Ltd.)

The Publications of the Ordnance Survey and of the Geological Survey can be purchased from Agents in most of the chief towns in the United Kingdom, through any Bookseller, or from the Director-General of the Ordnance Survey, Southampton, or, in the case of Ireland, from the Superintendent, Ordnance Survey, Dublin. In addition, Small Scale Maps are, as a rule, procurable at Railway Bookstalls in England and Wales.

The Journal of the Board of Agriculture is published monthly by the Board, at 4 Whitehall Place, S.W. Prior to April 1907, it was published by Laughton & Co., Ltd., 3 Wellington Street, Strand, W.C. Price 4d.

The London Gazette is published on Tuesday and Friday evenings by Wyman & Sons, Ltd. Price 1s. Prior to No. 28,435, dated Nov. 8, 1910, it was published by Harrison & Sons, St. Martin's Lane, S.W.

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Statutes—

Public General Acts, 1910. In separate chapters, at varying prices.

Local and Personal Acts, 1910. 3d. per 4 pp.

Public General, Session 1910. With Index, Tables, &c. Cloth. 3s.

Second Revised Edition. 1235-1900. Vols. I. to XX. 7s. 6d. each.

Statutes in Force, Chronological Table and Index of. 25th Edition. To the end of the Session 9 Edward VII. (1909). 2 Vols. 10s. 6d.

Acts of the Parliaments of Scotland, 1424-1707. Revised Edition. 10s.

Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character. Issued in 1890 to 1909. 10s. each.

Statutory Rules and Orders revised, in force on Dec. 31, 1903. Vols. I. to XIII. 10s. each.

Statutory Rules and Orders in force on 31st December 1909. Index to. 10s.

PARLIAMENTARY DEBATES. House of Lords and House of Commons; each daily part 3d.; also issued in bound volumes with Index.

MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS. 1d. per 4 pp. Subscription, Session 1911, 30s.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS. 1d. per 8 pp. Subscription, Session 1911, 30s.

HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.

[Cd. 5552.] STATISTICAL ABSTRACT OF THE BRITISH EMPIRE. 1895-1909. 1s. 3d.

[Cd. 5296.] Do. do. UNITED KINGDOM. 1895-1909. 1s. 8d.

[Cd. 5420.] Do. do. COLONIES. 1895-1909. 1s. 10d.

[Cd. 5345.] Do. do. BRITISH INDIA. 1899-1900 to 1908-1909. 1s. 3d.

[Cd. 5446.] Do. do. FOREIGN COUNTRIES. 1898-1908-9. 1s. 9d.

[Cd. 5355.] PUBLIC EDUCATION. ENGLAND AND WALES. Statistics, 1908-9. 2s. 4d.

[Cd. 5545.] CENSUS OF PRODUCTION. 1907. Part VII. 5d.

[Cd. 5299.] LICENSING STATISTICS, 1909. Report on. 2s.

[Cd. 5415.] FOREIGN LABOUR STATISTICS, 1909. 2s. 1d.

[Cd. 5418.] DECLARATION OF LONDON. Correspondence. 1910. 3d.

[Cd. 5426.] BOARD OF EDUCATION. Report of Chief Medical Officer. 1909. 11d.

[Cd. 5432.] WELSH CHURCH. Royal Commission. Report and Minority Reports. 3s. 3d.

[Cd. 5460.] AGRICULTURE. Earnings and Hours Enquiry. 1907. Report. 8d.

[Cd. 4991, 5369, 5370, 5371.] CANADA AND THE WEST INDIES. Royal Commission. Report on Trade Relations between, with Evidence, &c. 5s. 9d.

[Cd. 5386.] WORKMEN'S COMPENSATION STATISTICS. 1909. 7d.

[Cd. 5366.] EMPLOYERS AND WORKPEOPLE, U.K. Report on Collective Agreements. 2s. 2d.

[Cd. 5394.] COLONIAL IMPORT DUTIES. 1910. 3s. 1d.

[Cd. 5399, 5413.] MINES AND QUARRIES, 1909. Labour and Output. 2s. 3d.

[Cd. 5457, 5509.] LIVE STOCK AND AGRICULTURE, SCOTLAND. Report of Committee, with Evidence, &c. 1s. 4d.

[Cd. 5453.] AERONAUTICS. Interim Report of Advisory Committee, 1910-11. 1s. 2d.

[Cd. 5447.] CANALS AND WATERWAYS. Royal Commission. Reports on the Water Supplies of Canal Routes. 7s. 2d.

[Cd. 5441.] POOR RELIEF. Foreign and Colonial Systems. 3s. 9d.

[Cd. 5485.] BIRTHS, DEATHS, AND MARRIAGES. ENGLAND AND WALES, 1909. 72nd Report of the Registrar General. 2s. 10d.

FIFTY-SIXTH
ANNUAL REPORT
OF THE
REGISTRAR-GENERAL
ON THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED IN
SCOTLAND
DURING THE
YEAR 1910;
AND
FORTY-SIXTH ANNUAL REPORT
ON
VACCINATION.

REPORT.

TO THE RIGHT HONOURABLE
LORD PENTLAND,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 27th March 1911.

MY LORD,

I HAVE now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1910, drawn up in the usual form, with a view to its being laid before Parliament.

I have also the honour to submit to your Lordship, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Forty-sixth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1909.

I have the honour to be,

MY LORD,

Your most obedient Servant,

J. PATTEN MACDOUGALL,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL

BY JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. (Edin.)

SIR,

I have the honour to submit—the Fifty-sixth Report regarding the Births, Deaths, and Marriages registered in Scotland. In it there are given facts regarding the births, deaths, and marriages registered in Scotland during the year ending 31st December 1910. Fuller information regarding those births, deaths, and marriages will be given in the Fifty-sixth Detailed Annual Report, which will be submitted at a later date.

I also submit the Forty-sixth Annual Report on Vaccination; in it is contained information regarding the administration of the Vaccination (Scotland) Acts, 1863 to 1907, more especially regarding the vaccination of children born in Scotland during the year ending 31st December 1909.

Among the more outstanding features of these reports the following may be selected:—

The number of births registered is the smallest in any year since 1890, and the birth-rate of Scotland for the year is the lowest recorded in these reports—that is, since 1855.

The marriage-rate, though slightly higher than that of the previous year, remains low, and is lower than the marriage-rates of all previous years since 1855, that of 1909 excepted.

The death-rate of the year is the lowest on record, that also is since 1855. This is the first year in which the Scottish death-rate has fallen below 15 per thousand.

The death-rate in the Principal Town Registration Districts is found to be less than that in the Mainland-Rural Registration Districts. In the early years of registration, that of the former was found to be as much as fifty per cent. greater than that of the latter, but the difference, more especially since 1875, has been a diminishing quantity, and this year, for the first time, as above stated, the death-rate of the former is actually less than that of the latter.

An examination of the deaths registered in the eight selected towns shows that the year has been one without serious epidemic, an outbreak of measles excepted. The epidemic of cerebro-spinal meningitis which commenced in 1906 has now practically subsided.

The annual death-rate from phthisis in the eight towns is found to show a decrease. Table XII B. has been constructed to show the amount of diminution of this rate in each of the eight towns during the last ten years, and it is satisfactory to note how great that reduction has been; in Edinburgh and Leith it has amounted to over 45 per cent.

The vaccination returns show that the use of the power of exemption from vaccination by reason of the conscientious objection of the parents has been largely taken advantage of, with the result that the proportion of children avoiding vaccination is largely increased. It is estimated that the passing of the Vaccination (Scotland) Act, 1907, has resulted in two years in adding 45,000 unvaccinated children to the population.

I.—BIRTHS, DEATHS, AND MARRIAGES IN SCOTLAND.

POPULATION.

It is now very nearly ten years since the last Census of Scotland was taken, and consequently errors in estimating population may, with reason, be expected to be heavy, and the estimates themselves are given, and should be taken, with great reserve. The Census of 1911 falls to be made in the immediate future, and after that is done estimates used in this report, or at all events the more important of them, will be revised, and the revised figures will be shown in subsequent issues.

The estimated population of Scotland in the middle of 1910, the year now under review, as based on the 1901 Census, and the difference between the 1891 Census and the 1901 Census, is 4,929,251, the male population being estimated at 2,411,857, and the female population at 2,517,394. Compared with the estimates of the previous year, 1909, that of the male population is 26,950 more, of the female population 24,653 more, and of the total population 51,603 more.

The natural increase of the population, the excess of births over deaths, between the middle of the year 1909 and the middle of the year 1910 amounted to 51,927, but that figure is almost certainly in excess of the true increase of population, it being almost a certainty that there has been more emigration from the country than immigration into the country during the period.

All rates relative to the year's statistics are based on the estimated population, and the reserve expressed as to the reliability of the estimation of the population equally applies to them, and consequently the rates should only be accepted as provisional.

Of the estimated population, 2,293,121, or 46·5 per cent., live in the Principal Town Registration Districts; 618,869, or 12·6 per cent., in the Large Town Districts; 986,954, or 20·0 per cent., in the Small Town Districts; 919,523, or 18·7 per cent., in the Mainland-Rural Districts; and 110,784, or 2·2 per cent., in the Insular-Rural Districts. The Principal Town Districts are those towns which, at the time of the 1901 Census, had populations of over 30,000; the Large Town Districts are registration districts containing towns which at that time had populations of between 10,000 and 30,000; the Small Town Districts are those containing towns having populations of between 2000 and 10,000; the Mainland-Rural Districts are mainland registration districts or parts of districts not included in the above urban districts; and the Insular-Rural Districts are insular registra-

tion districts not included in the urban districts. Compared with the estimated population of the corresponding group of registration districts for the previous year, 1909, that of the Principal Town Districts is 38,153 more, of the Large Town Districts 6348 more, and that of the Small Town Districts 8681 more, but that of the Mainland-Rural Districts is 958 less, and that of the Insular-Rural Districts 621 less.

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1910, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

YEAR.	Estimated Population.	BIRTHS.		DEATHS.	MAR-RIAGES.	Excess of Births over Deaths.	Rate per 1000 of Population.			Percent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

BIRTHS.

The births registered in Scotland during the year 1910 numbered 124,000. They are 4582 fewer than in the previous year, 6440 less than the average number during the preceding five years, and 7419

less than the average number registered during the preceding ten years.

The maximum number of births registered in Scotland in any one year was in 1903, that number being 133,525. Since that year the diminution has been a decided one, and more so during the last two years. Compared with the number of births registered in 1903, those of 1904 are 0·7 per cent. fewer; those of 1905, 1·6 per cent. fewer; those of 1906, 1·1 per cent. fewer; those of 1907, 3·5 per cent. fewer; those of 1908, 1·6 per cent. fewer; those of 1909, 3·7 per cent. fewer; and those of 1910, 7·1 per cent. fewer.

The birth-rate of the year is 25·16 per 1000, a rate which is 1·20 less than that of the previous year, 2·16 less than the birth-rates of the preceding five years, 3·11 less than the mean of the rates of the preceding ten years, and is the lowest Scottish annual birth-rate yet recorded, and that is since 1855. The previous lowest was that of 1909, which was 26·36. The birth-rate thus continues to show the marked decline which has been commented on in previous reports. From 1855 to 1893 the national birth-rate varied between 30 and 35·6 per thousand, from 1894 to 1903 it varied between 29 and 31, in

SCOTLAND . . .	2,411,857	2,517,394	4,929,251	63,000	60,910	124,000	8,492	36,070	36,175	72,245	30,866

1904 and 1905 it was between 28 and 29, in 1906 it, for the first time, fell below 28, in 1907 it fell below 27, and this year, 1910, it has for the first time fallen below 26 per thousand.

In the principal towns the birth-rate of the year ranged from 32·1 in Coatbridge, 31·7 in Hamilton, and 29·3 in Greenock, to 19·6 in Edinburgh, 21·3 in Kilmarnock, and 21·6 in Perth. In Motherwell it was 28·9, in Dundee 26·3, in Leith 25·7, in Govan 25·2, in Glasgow 25·1, in Paisley 23·9, in Kirkcaldy 23·8, in Aberdeen 23·1, and in Partick 22·5. In the previous year the principal town with the highest birth-rate was Hamilton, 33·4, and the one with the lowest birth-rate was Edinburgh, 20·9.

Of the 124,000 children whose births were registered during the year, 8492, or 6·85 per cent., were illegitimate. These births are 348 fewer than those of the previous year, 534 fewer than the average annual number of the preceding five years, and 271 fewer than that of the preceding ten years. The illegitimate rate is 0·02 less than that of the previous year, 0·07 less than the mean of those of the previous five years, but is 0·18 more than the mean of the corresponding rates of the preceding ten years.

In the groups of registration districts the illegitimate rate of the year varied from 8·9 in the Mainland-Rural Districts, to 5·4 in the

Large Town Districts. In the Principal Town Districts it was 6·8, in the Small Town Districts 6·2, and in the Insular-Rural Districts 6·0. In the divisions of the counties this rate ranged from 12·3 per cent. in the North-Eastern, and 11·5 in the Southern, to 5·2 in the West-Midland. In the Northern it was 8·5, in the East-Midland 6·9, in the South-Eastern 6·9, in the North-Western 6·5, and in the South-Western 5·6. In the counties the illegitimate rate of the year ranged from 14·1 in Banff, 13·8 in Elgin, 13·0 in Wigtown, 12·7 in Caithness, 12·3 in Aberdeen, and 12·2 in Kirkcudbright, to 4·3 in Dumbarton and Renfrew, and 4·6 in Shetland and Linlithgow. In nine counties the illegitimate rate of the year exceeded 10 per cent., in 20 counties it was between 5 and 10 per cent., in four counties it was less than 5 per cent. In the previous year this rate exceeded 10 per cent. in nine counties, and was less than 5 per cent. in six counties. It was in the same nine counties in both years that this rate was more than 10 per cent., those nine counties being Caithness, Nairn, Elgin, Banff, Aberdeen, Roxburgh, Dumfries, Kirkcudbright, and Wigtown.

Of the total children whose births were registered during the year, 63,090 were male, and 60,910 female. The ratio of male to female children was thus 103·6 to 100. The birth-rate of male children per thousand of the estimated male population was 26·2, and of female children per thousand of the estimated female population 24·2; the former is 1·4 less than in the previous year, and the latter is 1·0 less than in that year.

The birth-rate of the first quarter of the year was 25·0, of the second quarter 27·5, of the third quarter 24·2, and of the fourth quarter 23·9.

The average number of births registered in Scotland daily during the year was 340. This average varied from 377 in May, and 371 in April, to 318 in September, and 319 in November. In June this average was 366, in March 348, in February 338, in July 331, in August 331, in January 328, in December 328, and in October 322.

DEATHS.

The total number of deaths registered in Scotland during 1910 was 72,245; they are 2349 fewer than in the previous year, 3735 less than the average number registered during the preceding five years, and 5178 less than the average number registered during the preceding ten years. The number of deaths registered is the smallest for any year since 1896.

Of the 72,245 deaths, 33,267, or 46·1 per cent., were registered in the Principal Town Districts; 9696, or 13·4 per cent., in the Large Town Districts; 14,116, or 19·5 per cent., in the Small Town Districts; 13,514, or 18·7 per cent., in the Mainland-Rural Districts; and 1652, or 2·3 per cent., in the Insular-Rural Districts. Compared with the corresponding figures of the previous year, deaths registered in the Principal Town Districts are 2294 fewer, and those in the Mainland-Rural Districts 66 fewer, but those in the Large Town Districts are of the same number, in the Insular-Rural Districts 5 more, and in the Small Town Districts 6 more.

The Scottish death-rate of the year was 14·66 per thousand of the estimated population, a rate which is 0·63 less than that of the

previous year, 1·25 less than the mean of the death-rates of the preceding five years, and 2·00 less than the mean of the death-rates of the preceding ten years. It is the lowest annual Scottish death-rate yet recorded, the previous lowest being that of 1909, which was 15·29. From 1855 to 1880, with the exception of 1856, the national death-rate was constantly over 20 per thousand, in 1881 it was for the first time below 20, in 1886 for the first time below 19, in 1894 for the first time below 18, in 1896 for the first time below 17, in 1905 for the first time below 16, and in this year for the first time below 15.

In the groups of registration districts the death-rate of the year varied from 15·7 in the Large Town Districts, to 14·3 in the Small Town Districts. In the Insular-Rural Districts it was 14·9, in the Mainland-Rural Districts 14·7, and in the Principal Town Districts 14·5. This is the first year in which the death-rate in the Principal Towns has fallen below that in the Mainland-Rural Districts. This fact, if true, is a striking one, and bears good testimony to the beneficial influences of the sanitary legislation of the last quarter of a century; but, as previously pointed out in this report, the length of time that has elapsed since the last Census makes the population estimates somewhat doubtful, and statistical inferences should now be made and accepted with reserve. The difference between the death-rates in the Principal Town Districts and those in the Mainland Rural Districts since the institution of national registration are shown in Table VIA., and it may there be seen that since 1875 the difference, which previous to 1875 was large, has since been a steadily diminishing quantity. In the earlier years of registration, from 1855 to 1875, the death-rate in the Principal Towns was constantly more than 50 per cent. above that in the Mainland-Rural Districts, but that difference now no longer exists.

Compared with the corresponding rates of the previous year, the death-rate of the Principal Town Districts shows a decline of 1·3, and those of the Large and Small Town Districts, and of the Main-

TABLE VIA.—Comparing Death-rates per 1000 in the Principal Towns and the Mainland-Rural Districts of Scotland, 1855-1910.

PERIOD.	DEATH-RATE.		
	In Principal Town Districts.	In Mainland-Rural Districts.	Principal Town Rate compared with Mainland-Rural Rate.
1855-60 . . .	27·41	16·45	+10·96
1861-65 . . .	28·54	17·27	+11·27
1866-70 . . .	28·02	17·09	+10·93
1871-75 . . .	28·00	17·48	+10·52
1876-80 . . .	24·26	16·88	+ 7·38
1881-85 . . .	23·01	15·79	+ 7·22
1886-90 . . .	21·17	15·92	+ 5·25
1891-95 . . .	21·19	16·53	+ 4·66
1896-1900 . . .	19·97	15·97	+ 4·00
1901-05 . . .	18·13	15·34	+ 2·79
1906 . . .	16·57	15·09	+ 1·48
1907 . . .	16·80	15·39	+ 1·41
1908 . . .	16·24	15·65	+ 0·59
1909 . . .	15·77	14·75	+ 1·02
1910 . . .	14·51	14·70	— 0·19

land-Rural Districts, one of 0·1, but that of the Insular-Rural Districts shows a rise of 0·1.

In the divisions of the counties the death-rate of the year varied from 16·0 in the Northern, to 13·6 in the North-Eastern. In the East-Midland Division it was 15·5, in the North-Western 15·3, in the Southern 15·2, in the West-Midland 14·8, in the South-Western 14·7, and in the South-Eastern 13·9. Compared with the corresponding rates of the previous year, the death-rates of the South-Western and South-Eastern Divisions are 1·0 less, of the North-Eastern 0·5 less, and of the East-Midland and Southern 0·2 less, but that of the North-Western is 0·2 more, of the Northern 0·3 more, and of the West-Midland 0·5 more.

The death-rate of the year in the principal towns ranged from 19·7 in Dundee, and 19·2 in Greenock, to 9·6 in Partick, and 10·0 in Govan. In Coatbridge it was 17·7, in Perth 16·2, in Glasgow 15·1, in Edinburgh 14·0, in Paisley 13·8, in Hamilton 13·5, in Kilmarnock 13·4, in Leith 13·3, in Aberdeen 12·1, in Kirkcaldy 12·0, and in Motherwell 11·6. Compared with the rates of the previous year, those of Dundee, Greenock, Coatbridge, Kilmarnock, and Motherwell show an increase, but that of Perth is of the same quantity, and those of the remaining nine towns all show a decrease. The death-rates of Glasgow, Edinburgh, Aberdeen, Paisley, Leith, Govan, Partick, Kirkcaldy, and Hamilton are the lowest yet recorded for those towns.

The national death-rate in the first quarter of the year was 17·0, in the second quarter 15·1, in the third quarter 12·3, and in the fourth quarter 14·3. Compared with the corresponding rate of the previous year, that of the first quarter is 0·9 less, of the second quarter 0·1 less, of the third quarter 0·1 more, and that of the fourth quarter 1·7 less.

Of those whose deaths were registered during the year, 36,070 were male, and 36,175 female. The death-rate of the male population was 15·0 per thousand, and that of the female population 14·4 per thousand; compared with the corresponding rate of the previous year, both are 0·6 less.

The average number of deaths registered daily during the year was 198. That average varied from 236 in January, and 231 in February, to 160 in July, and 169 in September and October. In April this average was 227, in March 220, in December 205, in November 204, in May 203, in June 183, and in August 171.

MARRIAGES.

Marriages registered in Scotland during 1910 numbered 30,866; they are 774 more than were registered during the previous year, but 1016 fewer than the average number registered during the preceding five years, and 1111 fewer than the average number during the preceding ten years.

Of the 30,866 marriages, 16,246, or 52·7 per cent., were registered in the Principal Town Districts; 4083, or 13·2 per cent., in the Large Town Districts; 5829, or 18·9 per cent., in the Small Town Districts; 4366, or 14·1 per cent., in the Mainland-Rural Districts; and 342, or 1·1 per cent., in the Insular-Rural Districts. Compared with the returns of the previous year, the marriages in the

Principal Town Districts are 526 more, in the Large Town Districts 171 more, in the Small Town Districts 108 more, and in the Insular-Rural Districts 6 more, but those in the Mainland-Rural Districts are 37 fewer.

The marriage-rate of the year is 6·26; it is 0·09 above that of the previous year, but is 0·42 less than the mean of the marriage-rates of the preceding five years, and 0·62 less than the mean of the rates of the preceding ten years. The marriage-rate, though somewhat above that of the previous year, is exceptionally low; it is less than all previous Scottish marriage-rates since 1855, that of 1909 excepted.

In the groups of registration districts the marriage-rate of the year ranged from 7·1 in the Principal Town Districts, to 3·1 in the Insular-Rural Districts. In the Large Town Districts it was 6·6, in the Small Town Districts 5·9, and in the Mainland-Rural Districts 4·7. Compared with the corresponding rate of 1909, the marriage-rate of the Large Town Districts is 0·2 more, and those of the Principal Town, Small Town, and Insular-Rural Districts 0·1 more, but that of the Mainland-Rural Districts is 0·1 less.

In the divisions of the counties, the marriage-rate varied from 6·8 in the South-Eastern, to 4·0 in the North-Western. In the East-Midland it was 6·6, in the South-Western 6·5, in the Southern 6·1, in the North-Eastern 5·9, in the West-Midland 5·2, and in the Northern 4·3. Compared with the corresponding rate of the previous year, the marriage-rate is 0·2 more in the South-Western, and 0·1 more in the East and West Midland, but in the North-Western and Southern divisions there is no change, in the South-Eastern it is 0·1 less, and in the Northern and North-Eastern 0·2 less.

In the Principal Towns the marriage-rate of the year ranged from 8·2 in Perth, 7·7 in Glasgow, and 7·6 in Edinburgh, to 4·5 in Partick, 5·1 in Govan, and 5·5 in Motherwell. In Aberdeen it was 7·1, in Greenock 7·1, in Dundee 7·0, in Kilmarnock 7·0, in Kirkcaldy 6·5, in Leith 6·3, in Paisley 6·2, in Coatbridge 5·8, and in Hamilton 5·7.

The marriage-rate of the first quarter of the year was 6·0, that of the second quarter 6·5, of the third quarter 6·4, and of the fourth quarter 6·2.

The daily average number of marriages registered during the year was 85. This average varied from 148 in June, to 39 in May. In July it was 122, in January 119, in December 117, in April 76, in September 72, in October 70, in March and in August 65, in November 62, and in February 58.

II.—CAUSES OF DEATH IN EIGHT OF THE PRINCIPAL TOWNS.

In this section of the Report there is given an analysis of the causes of death in eight of the principal towns, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth. The information on which the statements are founded is compiled from returns furnished weekly by the Registrars of the eight towns. Similar returns are not received from the Registrars of the remaining portions of Scotland, and consequently an examination of the causes

of all deaths registered in Scotland during the year is not yet possible. When the full information is received at this Office—that is, after the registers have been examined and transmitted here—a full analysis of the deaths in the entire country will be made and published in the Detailed Annual Report of the year. As fully 38 per cent. of the population of Scotland live in the selected eight principal towns, it is reasonable to assume that the causes of death found to be prevalent in them during the year are a fairly good indication of the causes of death generally prevalent in the country during the period.

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight Principal Towns of Scotland, during each of the Years 1855–1910.

YEARS.	Population estimated to the middle of each Year.	BIRTHS.			DEATHS.		MARRIAGES.	
		Number.	Rate per 1000 of Population.	Percent/age of Illegitimate.	Number.	Rate per 1000 of Population.	Number.	Rate per 1000 of Population.
1855	827,568	28,113	33.9	7.5	22,706	27.4	6,937	8.4

1909	1,865,571	47,019	25.2	7.5	30,765	16.5	13,637	7.3
1910	1,891,938	46,432	24.0	7.4	28,496	15.1	14,041	7.4

The birth, death, and marriage rates of each of the eight towns have been stated in the earlier portions of this Report. The aggregate birth-rate of the eight towns for the year was 24·0 per thousand, the marriage-rate 7·4 per thousand, and the death-rate 15·1 per thousand. This marriage-rate is slightly above that of the previous year, which was 7·3, but the birth and death rates are both the lowest

TABLE VIII.—Births, Deaths, and Marriages registered during 1910, and their Proportion to the Estimated Population, in the Principal Towns of Scotland; Estimated Number of Unmarried Women and Widows between 15 and 45 years of age; and the Illegitimate Births, and their Proportion to the Total Births and to the Estimated Number of Possible Mothers.

Dundee . . .	21·1	21·1	19·0	18·1	20·2	18·0	19·6	19·1	18·6	18·2	19·3	19·7
Aberdeen . . .	19·0	18·2	17·9	17·0	17·8	16·2	15·1	14·3	14·0	14·6	16·4	12·1
Paisley . . .	20·5	18·6	19·1	17·3	18·8	16·1	15·6	16·1	15·4	16·4	17·4	13·8
Leith	16·0	17·7	15·4	16·2	14·7	13·9	14·8	16·6	15·4	13·5	15·4	13·3
Greenock . . .	19·2	19·5	19·9	18·9	17·8	18·8	17·9	17·8	17·0	15·2	18·2	19·2
Perth	21·6	17·3	18·1	16·7	18·1	17·1	16·3	17·9	16·8	16·2	17·6	16·2

recorded, the lowest birth-rate previously recorded being that of 1909, which was 25·2, and the lowest previously recorded death-rate being 16·5, which also was the rate of 1909.

Deaths registered in the eight towns numbered 28,496; they are 2269 fewer than in the previous year, 2242 less than the average number during the preceding five years, and 2997 less than the average number during the preceding ten years.

Of the 28,496 deaths, 13,395 were registered in Glasgow, 5036 in Edinburgh, 3353 in Dundee, 2255 in Aberdeen, 1290 in Paisley, 1154 in Leith, 1410 in Greenock, and 603 in Perth.

Deaths in the eight towns of children of less than one year old numbered 5559. Births in the towns numbered 45,482, and thus the infantile mortality rate amounted to 122 per thousand births. This rate is 7 less than that of the previous year, 10 less than that of 1908, 6 less than that of 1907, and 8 less than that of 1906. It varied from 170 in Dundee, to 84 in Perth. In Greenock it was 129, in Glasgow 121, in Paisley 114, in Aberdeen 112, in Edinburgh 111, and in Leith 108. Compared with the corresponding rates of 1909, the infantile mortality rate of Aberdeen is 39 less, of Glasgow 12 less, of Edinburgh 8 less, of Paisley 6 less, and of Perth 3 less, but that of Leith is of the same amount, that of Dundee is 26 more, and that of Greenock 34 more.

Deaths of children of less than five years old numbered 9317, and constituted 32·7 per cent. of the total. These deaths are 893 fewer than in the previous year, and the proportion they constitute

TABLE X.—Death-rate of Children under Five Years of Age in Eight of the Principal Towns of Scotland in 1910.

Towns.	Estimated Number of Living Children under 5 years in 1910.	Deaths under 5 years of age.		
		Number.	Rate per 1000 Children under Five.	Percentage of Total Deaths.
Glasgow	105,948	4,673	44·1	34·9
Edinburgh	35,793	1,212	33·9	24·1
Dundee	19,074	1,353	70·9	40·4
Aberdeen	23,080	652	28·2	25·9
Paisley	11,240	390	34·7	30·2
Leith	10,774	396	36·8	34·3
Greenock	8,974	518	57·7	36·8
Perth	3,768	123	32·6	20·4

TABLE XA.—Infantile Mortality in Eight of the Principal Towns of Scotland during the Year 1910.

Towns	Births in 1910.	Deaths of Infants under 1 year of age.		
		Number.	Rate per 1000 Births.	Percentage of Total Deaths.
Glasgow	22,222	2,694	121	20·1
Edinburgh	7,063	783	111	15·5
Dundee	4,472	759	170	22·6
Aberdeen	4,299	480	112	21·3
Paisley	2,232	255	114	19·8
Leith	2,234	241	108	20·9
Greenock	2,155	279	129	19·8
Perth	805	68	84	11·3

of the total deaths is 0·5 less. This rate varied from 40·4 in Dundee, to 20·4 in Perth. In Greenock it was 36·8, in Glasgow 34·9, in Leith 34·3, in Paisley 30·2, in Aberdeen 28·9, and in Edinburgh 24·1.

Deaths from the principal infectious diseases, namely, smallpox, measles, scarlet fever, influenza, hooping-cough, diphtheria, and "fevers," numbered 2432; they are 350 fewer than in the previous year, and are equal to a death-rate from these causes of 129 per 100,000, which is 21 less than in 1909. These deaths include 1123 from measles, 269 from scarlet fever, 53 from influenza, 408 from hooping-cough, 434 from diphtheria, 7 from typhus fever, 97 from enteric fever, 39 from cerebro-spinal fever, and 2 from fever the nature of which was unspecified. The death-rate from these causes ranged from 263 per 100,000 in Dundee, where measles, scarlet fever, hooping-cough, and diphtheria were prevalent at some time during the year, and 250 in Greenock, where measles and hooping-cough were prevalent, to 40 in Aberdeen. In Glasgow this rate was 140, in Perth 116, in Leith 107, in Paisley 83, and in Edinburgh 79. Compared with the corresponding rates of 1909, that of Greenock is 166 more, of Dundee 179 more, of Leith 60 more, and of Perth 53 more,

but that of Paisley is 99 less, of Aberdeen 83 less, of Glasgow 64 less, and of Edinburgh 24 less.

No deaths from smallpox were registered in the eight towns during the year. In the previous year there were also none, but in 1908 there were six.

Deaths from measles numbered 1123; they are 552 more than in the previous year, and 32 more than in 1908. Of them, 535 were registered in Glasgow, 288 in Dundee, 121 in Edinburgh, 96 in Greenock, 40 in Leith, 35 in Paisley, and 4 each in Aberdeen and Perth. The death-rate from measles was 60 per 100,000, which rate ranged from 170 in Dundee, and 131 in Greenock, to 2 in Aberdeen and 11 in Perth. In Glasgow it was 61, in Leith 46, in Paisley 37, and in Edinburgh 34.

Deaths from scarlet fever numbered 269; they are 9 more than in the previous year, and 77 more than in 1908. The death-rate from this disease amounted to 14 per 100,000, which is the same as in 1909, but 3 more than in 1908. This death-rate varied from 38 in Perth, and 21 in Greenock, to 3 in Aberdeen and 5 in Leith. In Dundee it was 18, in Glasgow 17, in Edinburgh 12, and in Paisley 11.

Deaths attributed to influenza, exclusive of those in which

well-defined causes of death were stated in the death certificates, amounted to 53, which is 34 less than in 1909, and 39 fewer than in 1908. The influenza death-rate was 3 per 100,000.

Deaths from hooping-cough numbered 408; they are 860 fewer than in 1909, and 526 fewer than in 1908. The death-rate is 22 per 100,000, which is 46 below that of 1909, and 29 below that of 1908. This death-rate varied from 51 in Greenock, to 3 in Perth, and 6 in Paisley. In Dundee it was 29, in Leith 28, in Glasgow 27, in Aberdeen 10, and in Edinburgh 9.

Deaths from diphtheria numbered 434, and are 47 more than in the previous year, and 143 more than in 1908. The death-rate from this cause is 23 per 100,000, which is 2 above that of 1909, and 7 above that of 1908, and ranged from 49 in Perth, and 41 in Dundee, to 17 in Edinburgh and in Paisley. In Glasgow it was 23, in Aberdeen 20, in Leith 19, and in Greenock 19.

Deaths from typhus fever numbered 7; of them 2 were registered in Glasgow, and 5 in Leith.

Enteric fever was the certified cause of 97 deaths, which is 22 fewer than in the previous year, and 2 fewer than in 1908. Of these deaths 56 were registered in Glasgow, 16 in Greenock, 8 in Edinburgh, 5 each in Dundee and Paisley, 4 in Perth, 2 in Aberdeen, and 1 in

Leith. The death-rate from this cause was 5 per 100,000, and ranged from 22 in Greenock, and 11 in Perth, to 1 in Aberdeen and in Leith.

Cerebro-spinal meningitis was the certified cause of 39 deaths during the year; of them 32 were registered in Glasgow, 4 in Edinburgh, and 1 each in Dundee, Aberdeen, and Greenock. These deaths are 42 fewer than in 1909, and 175 fewer than in 1908. An epidemic of this disease in Scotland commenced in 1906, it reached a maximum in 1907, and since then has been declining, and is now nearly subsided. In the eight towns in 1906 there were 156 deaths from this cause, and in 1907 there were 1018; in 1908 they fell to 214, in 1909 to 81, and in 1910, as above noted, to 39.

Deaths from diarrhœas, including those certified as due to enteritis and gastro-enteritis, numbered 1168; they are 278 more than in 1909, but 66 fewer than in 1908. The annual death-rate from these causes is 62 per 100,000, which is 14 more than in 1909, but 5 less than in 1908. This death-rate varied from 123 in Dundee, to 35 in Edinburgh. In Glasgow and in Paisley it was 68, in Greenock 66, in Leith 43, in Aberdeen 40, and in Perth 40. Of these deaths, 187 were certified as due to epidemic diarrhœa or infective enteritis, 304 to diarrhœa not otherwise specified, 337 to enteritis, and 340 to gastro-enteritis.

Deaths from tuberculous disease numbered 3458; they are 305 fewer than in the previous year, and 424 fewer than in 1908. The death-rate from tuberculous disease amounted to 184 per 100,000; it is 19 below the corresponding rate of 1909, and 28 below that of 1908. This death-rate ranged from 248 in Dundee, and 217 in Greenock, to 141 in Aberdeen. In Glasgow it was 195, in Leith 180, in Perth 167, in Paisley 159, and in Edinburgh 151. Of the deaths from tuberculous disease, 2175 were ascribed to phthisis, 546 to tuberculous meningitis, 373 to tuberculous peritonitis or tabes, and 364 to other tuberculous disease.

Deaths ascribed to phthisis in the eight towns during the year numbered 2175; they are 184 fewer than in 1909, and 248 fewer than in 1908. The equivalent annual death-rate is 116 per 100,000, which is 11 less than in the previous year, and 17 less than in 1908. This death-rate ranged from 152 in Dundee, to 94 in Aberdeen, and 97 in Edinburgh. In Perth it was 127, in Glasgow 122, in Greenock 119, in Paisley 110, and in Leith 105.

The aggregate death-rates for the eight towns from all tuberculous diseases and from phthisis in each of the past ten years are shown in Table XII B., as are also the same rates for each of those towns. In 1901 the aggregate death-rate from tuberculosis was 264 per 100,000, and from phthisis 179 per 100,000; compared with those figures the death-rate from all tuberculous disease in 1910 shows a decline of 30·3 per cent., and that from phthisis one of 35·2 per cent. The death-rate from all forms of tuberculous disease in each of the towns, with the exception of Dundee, shows a marked decline, varying from 43·7 per cent. in Edinburgh, and 37·1 in Leith, to 9·2 in Greenock. In Dundee the death-rate from tubercle was 248 in 1901, and is the same in 1910. The Edinburgh death-rate from phthisis in 1910 is found to be 46·4 per cent. less than in 1901, in Leith 45·3 per cent. less, in Glasgow 34·1 per cent. less, in Paisley

33·7 less, in Aberdeen 32·4 less, in Perth 21·1 less, in Greenock 19·6 less, and in Dundee 11·6 less.

TABLE XIIB.—Death-rate per 100,000 of Population, allowing for Causes not specified, from Tuberculosis and from Phthisis in each of Eight of the Principal Towns of Scotland, 1901-1910.

Deaths from malignant diseases numbered 2017; they are 14 more than were registered in the eight towns in 1909, and 134 more than were there registered in 1908. The annual death-rate from this cause is 107 per 100,000, which is 1 less than in 1909, but 4 more than in 1908. This rate varied from 140 in Edinburgh, to 64 in Paisley. In Dundee it was 120, in Glasgow 102, in Greenock 100, in Perth 100, in Aberdeen 94, and in Leith 80. Of these 2017 deaths, 1183 were ascribed to carcinoma, 109 to sarcoma, and 725 to other or unspecified form of cancer.

Deaths from pneumonia numbered 2730; they are 562 fewer than in the previous year, and 368 fewer than in 1908. The annual death-rate from this cause is 145 per 100,000, and is 32 below that of the previous year, and 25 below that of 1908. This death-rate varied from 186 in Dundee, to 97 in Perth. In Greenock it was 179, in Leith 158, in Glasgow 157, in Edinburgh 121, in Paisley 115, and in Aberdeen 107.

Deaths from bronchitis numbered 1948; they are 665 fewer than in the previous year, and 315 fewer than in 1908. The death-rate from bronchitis is 104 per 100,000, which is 37 below that of the previous year, and 20 below that of 1908, and varied from 163 in Paisley, to 77 in Edinburgh. In Dundee it was 147, in Greenock 126, in Glasgow 104, in Leith 93, in Perth 92, and in Aberdeen 83.

The death-rate from pneumonia and bronchitis combined is 249 per 100,000, which is 69 below that of 1909, and 45 below that of 1908. This rate ranged from 333 in Dundee, to 189 in Perth. In Greenock it was 305, in Paisley 278, in Glasgow 261, in Leith 251, in Edinburgh 198, and in Aberdeen 190.

Deaths from puerperal septic conditions and from diseases and accidents of pregnancy and childbirth numbered 270; they are 34 more than in the previous year, and 26 more than in 1908. Births registered in the eight towns during the year numbered 45,482, and thus deaths from these causes amounted to 5.9 per thousand births, a rate which is 0.9 above that of the previous year, and 0.8 above that of 1908. This rate ranged from 7.5 in Edinburgh, to 3.2 in Greenock. In Glasgow it was 6.5, in Perth 6.2, in Dundee 4.9, in Paisley 4.9, in Aberdeen 4.4, and in Leith 3.6.

Deaths attributed to violent causes numbered 1044, and are 42 fewer than in the previous year, and 197 fewer than in 1908. The death-rate from violence amounted to 56 per 100,000, which is 3 less than in 1909, and 12 less than in 1908. This death-rate ranged from 78 in Perth, to 32 in Paisley. In Dundee it was 64, in Greenock 62, in Glasgow 59, in Leith 58, in Edinburgh 48, and in Aberdeen 48. Of these 1044 deaths, 929 were attributed to accident, 108 to suicide, and 7 to homicide. The deaths from accident are 61 fewer than in the previous year, but those from homicide are of the same number, and those from suicide are 20 more. Of the accidental deaths, 188 were due to burning, 101 to drowning, 89 to overlaying or other forms of suffocation, 38 to poisoning, and 513 to other or unspecified accident.

In each 10,000 deaths from specified causes registered in the eight towns during the year there were 989 from heart disease, 859 from infective diseases, 757 from diseases of the respiratory organs, excluding those from pneumonia; 716 from diseases of the digestive system, exclusive of those certified as due to diarrhoea; 703 from diseases of the blood vessels, including apoplexies; 478 from diseases of the nervous system, apoplexies excluded; 435 from diseases of the urinary organs; and 369 from violent causes. Deaths from tuberculosis amounted to 1221 per 10,000 specified causes, from phthisis to 768, from pneumonia to 964, from bronchitis to 688, from malignant disease to 712, from apoplexy to 574, and from diarrhoeas, including those from enteritis and gastro-enteritis, to 412.

Among those whose deaths were registered in the eight towns during the year, there were 41 males and 110 females aged 90 years and upwards. The oldest of these men was a commercial traveller whose age was registered as 100, and the oldest of these women were three widows aged 100, 103, and 105.

III.—WEATHER AND ITS INFLUENCE ON MORTALITY.

The remarks regarding the weather of the year made in this section of the Report are based on notes prepared by Mr. Andrew Watt, M.A., Secretary of the Scottish Meteorological Society, and published in the Monthly and Quarterly Reports.

The mean temperature of the year in Scotland, as based on observations made at over seventy observation stations, was 46°.2 Fahrenheit, which is 0°·8 above that of the previous year, the same as the mean for the preceding ten years, but 0°·1 less than the mean for the preceding twenty years. The average rainfall, or, more strictly, the mean of the rainfalls observed at the observation stations,

was 41·36 inches, which is 2·27 inches more than in the previous year, 1·20 more than the mean of the rainfalls of the preceding ten years, and 1·43 more than those of the preceding twenty years.

These weather conditions, a normal mean temperature and a somewhat high average rainfall, have been accompanied by the lowest national death-rate on record, a rate which is 0·6 less than that of the previous year, 2·0 less than the mean of the death-rates of the preceding ten years, and 3·0 less than that of the preceding twenty years.

The mean temperature in the eight towns, those dealt with in the second section of this Report, was 47°·2, which is 0°·9 more than that of the previous year, and 0°·1 more than the mean for the preceding ten years, but 0°·1 below the mean for the preceding twenty years.

26	July 2	477	13·2	66·9	41·8	53·6	0·75	52	31	534	14·7	49·7	22·0	39·2	0·25

These weather conditions, a normal mean temperature and a high average rainfall, in the eight towns have been accompanied by the lowest aggregate death-rate on record, it being 1·4 less than that of the previous year, 3·0 less than the mean of the death-rates of the preceding ten years, and 3·4 less than those of the preceding twenty years.

Among the causes of death in the eight towns which show an increase as compared with the previous year, when the weather was colder and drier, are measles and diarrhoeas, and among those which show a decrease are hooping-cough, pneumonia, bronchitis, and phthisis. Deaths of children of less than five years show a decrease of 893, and those of persons of over sixty a decrease of 579.

FORTY-SIXTH ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND IN 1909.

The births of 128,720 living children were recorded in the registers during the year 1909. Of these children, 84,035 are reported to have been successfully vaccinated, 11,594 are reported to have died before the time of compulsory vaccination, leaving 33,091 as the number of children for whom certificates of successful vaccination were not produced. Compared with the corresponding numbers of the previous year, children successfully vaccinated are 7159 fewer, those dying before the time of compulsory vaccination are 1095 fewer, but those for whom no certificates of successful vaccination were received are 5568 more. Comparison with the corresponding numbers of the year 1905, the last year before the Vaccination (Scotland) Act, 1907, was effective, shows the number successfully vaccinated to be 27,893 fewer, those dying before the time of compulsory vaccination to be 574 fewer, but those not reported to have been successfully vaccinated to be 25,734 more.

TABLE XIX.—VACCINATIONS in SCOTLAND, 1899-1909, and Proportion to the Births each Year.

Years.		Success-fully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccination.			Died before Vaccination.	Statutory Declarations of Conscientious Objection.	Removed from District before Vaccination, or otherwise unaccounted for.	TOTAL BIRTHS.
				From Constitutional Insusceptibility.	From having had Smallpox.	From previous Vaccination.

The number of children reported to have been successfully vaccinated, including those certified as insusceptible by reason of previous vaccination, amount to 65·29 per cent. of the total children whose births were registered, and to 71·75 per cent. of the children surviving at the time of compulsory vaccination. These two percentages show a marked decrease since the passing of the Vaccination (Scotland) Act, 1907. In 1905 the percentage of the total children successfully

* Including such as were certified as Insusceptible of Vaccination "on the ground of previous successful vaccination," the children having been vaccinated by persons unauthorised to grant certificates.

† At the end of the year following that of registration of birth.

1905, and for some years before that, only about one child out of each sixteen surviving at the time of compulsory vaccination escaped vaccination, but in 1909 one in 3·5 escaped.

The number of children dying before the time of compulsory vaccination was 11,594. These children are 1095 fewer than in the previous year, and 1181 fewer than the average number during the preceding ten years. The percentage they form of the total was 9·01, which is 0·65 less than in the previous year, and 0·69 less than the mean of the corresponding rates of the preceding ten years.

Children whose vaccination was postponed by medical certificate on the ground of ill-health numbered 3354; they are 368 fewer than in the previous year, but 362 more than the average number during the preceding ten years. These children amounted to 2·61 per cent. of the total children registered, and 2·86 per cent. of those surviving at the time of compulsory vaccination. The former rate is 0·22 less than that of the previous year, but 0·34 more than the mean of the corresponding rates of the preceding ten years. The latter rate is 0·27 less than that of the previous year, but 0·34 more than the mean of the previous ten years. With the passing of the 1907 Act this rate, that of postponement of vaccination, showed a tendency to rise; it rose from 2·37 per cent. of the surviving children in 1905 to 3·31 per cent. in 1907, but since then it has declined, being 3·14 in 1908, and 2·86 in the year now under review.

Children reported to be unvaccinated by reason of constitutional insusceptibility numbered 784, which number is 12 less than in the previous year, but 179 more than the average number during the preceding ten years, and, with the exception of the years 1901 and 1908, is the largest number reported in any year since vaccination was made compulsory. These children amount to 0·61 per cent. of the total children, and to 0·67 per cent. of those surviving at the time of compulsory vaccination. One child in 149 was certified during the year to be constitutionally insusceptible, in 1908 one child in 149 was so certified, and in 1905, *i.e.*, the last year before the passing of the 1907 Act, only one child in 233 was so certified.

The amount of certified constitutional insusceptibility varied widely. In two counties no insusceptible children were reported, but in other counties a considerable proportion of the children were so certified, as for instance in Peebles, where one child in 62 was

certified to be insusceptible, and in Kirkcudbright, where the rate was one in 84. In the principal towns this rate ranged from 1 in 53 in Partick, 1 in 79 in Coatbridge, and 1 in 102 in Edinburgh, to 1 in 391 in Greenock, 1 in 366 in Motherwell, 1 in 346 in Aberdeen, and 1 in 344 in Hamilton. In the following registration districts the rate of certified constitutional insusceptibility was exceptionally heavy:—Auchterhouse (1 in 5), Rattray (1 in 8), Largo (1 in 15), Melrose (1 in 18), Waterside (1 in 19), Haddington (1 in 22), New Craighall (1 in 24), Hillhead (1 in 25), and Drainie (1 in 28).

The number of children reported to have been removed from the district of registration, or to have been otherwise lost sight of, was 6207, which number is 952 fewer than in the previous year, but is 1460 more than the average number during the preceding ten years, and 2193 more than in 1905. These children amount to 4·82 per cent. of the total children whose births were registered, and 5·30 per cent. of the children surviving at the time of compulsory vaccination. The former rate is 0·63 less than that of the previous year, but is 1·21 more than the average of the last ten years, and 1·77 more than the rate of 1905. The latter rate is 0·73 less than in the previous year, but 1·93 more than in 1905, and 1·30 more than the average of the last ten years.

Children who were not vaccinated by reason of the conscientious objection of their parents numbered 22,746, which is the largest number yet recorded. The Act affected only a portion of the children born in 1906, and certificates of conscientious objection were recorded in 253 instances only, in 1907 this number rose to 7258, in 1908 to 15,846, and, large though that figure is, it was exceeded in 1909 by 6900. Children unvaccinated for this reason amounted to 17·67 per cent. of the total children, and to 19·42 per cent. of those surviving at the time of compulsory vaccination. The former rate is 5·61 more than in 1908, and the latter 6·07 more. In the counties the conscientious objection rate expressed as per cent. of the total children registered ranged from 64·3 per cent. in Shetland, 33·1 in Selkirk, 30·9 in Clackmannan, 30·7 in Orkney, 29·7 in Dumbarton, 28·8 in Forfar, and 27·7 in Stirling, to 3·1 in Wigtown, 4·4 in Berwick, 5·0 in Bute, and 8·0 in Edinburgh. In the principal towns this rate varied from 38·2 in Kilmarnock, 35·2 in Hamilton, 34·3 in Dundee, 30·3 in Paisley, and 30·2 in Greenock, to 7·1 in Edinburgh, 7·4 in Aberdeen, and 10·6 in Leith. In Motherwell it was 23·5, in Kirkcaldy 22·6, in Govan 20·9, in Perth 14·9, in Coatbridge 14·5, in Partick 13·8, and in Glasgow 12·6.

In the last report on vaccination, that dealing with children whose births were registered in 1908, the opinion was expressed that it was due to the working of the Vaccination (Scotland) Act, 1907, that the proportion of children surviving at the time of compulsory vaccination and escaping vaccination had increased from 6·54 per cent. to 23·87 per cent., and that 20,000 unvaccinated children had been added to the population. In 1909 the proportion of children remaining unvaccinated at the time of compulsory vaccination was 28·25 per cent., and, attributing the excess to the same cause, the Act must be held responsible for adding fully 25,000 unvaccinated children to the population during the year now under review, and for adding no less than 45,000 in the course of two years.

Abstracts from notes by district examiners of registration and by registrars contain reference to the working of the Vaccination (Scotland) Act, 1907, and to those abstracts attention is drawn. They are published on pages 100 to 102 of this Report.

I have the honour to be,

SIR,

Your most obedient Servant,

JAMES C. DUNLOP.

9th March, 1911.

A.—BIRTHS

REGISTERED IN SCOTLAND DURING EACH MONTH OF THE YEAR 1910.

APPENDIX.

VACCINATIONS, 1909.

The following are Extracts from the Annual Reports of the Examiners of Registration, and notes forwarded by Registrars in compliance with the under-mentioned Instruction. The Examiners and Registrars alone must be considered responsible for the opinions which they express.

INSTRUCTION TO REGISTRARS.

"The Registrar will briefly state any special circumstances that may have occurred in his District in connection with the operation of the Vaccination Acts, also the reason, if an abnormal number be entered in any of the columns."

EXCERPT REPORTS OF THE DISTRICT EXAMINERS OF REGISTERS OF SCOTLAND, RELATIVE TO STATE OF VACCINATION IN THEIR SEVERAL DISTRICTS.

NORTHERN DISTRICT.

As regards vaccination, the Examiner reports that the Vaccination (Scotland) Act, 1907, "seems to have unsettled parents in regard to vaccination, many being under the impression that vaccination is not now necessary. Where, however, the fact is fully grasped, that this Act gives them a way of escape from vaccinating their children, and that this can be done free of charge, it is only too readily taken advantage of. The number of conscientious objectors is certainly on the increase, which is much to be regretted."

In Wick it is observed that there were 227 unvaccinated children for the year 1909; but this number seems to have been reduced by about 60 as at 30th December, 1910. In Perth there were 26 unvaccinated as at the end of 1909, and in Stornoway, Inverness, North Harris, Lochs, and Uig the proportion of unvaccinated children as at the same date was also very high. As regards Stornoway, the number was as high as 109, and the reason alleged for this large percentage is that the "lymph had been old and had not taken effect, and children said to be suffering from colds."

EASTERN DISTRICT.

The Examiner reports as follows:—"In a very sinister and significant fashion the adoption of the statutory declaration has increased. Such decrease is an obvious menace to public health. The figures in reports are

"astounding. No encouragement is given to parents by Registrars to adopt the declaration. But, of course, a Registrar is not empowered to offer any objection or hindrance to the use of the conscientious objection form; and magistrates sign such declarations very freely. It is understood that Medical Officers are supplied with lists of those children who have thus been exempted from vaccination by the so-called conscientious objections of their parents or guardians. More than once the Examiner has remarked in previous reports that the parents' objections are probably, in the majority of cases, now rather to the slight inconvenience and the payment of the small fee than any genuine physiological or pathological—far less conscientious—objection to vaccination, as a consequence of careful study."

"The growing number of unvaccinated children in Dundee, Kirkcaldy, and Aberdeen cannot well be regarded by a believer in vaccination with anything but the gravest concern."

WESTERN DISTRICT.

In the Examiner's notes on the working of the Vaccination Act he observes that he is assured "that really conscientious objection exists in the minds of only a small proportion of those making the declaration. The idea that they can get off with performing a disagreeable duty, or save the expense of a doctor's fee, weighs far more with many

"parents than any sense of responsibility for their children, or to the community at large. The wrong idea that vaccination is not so important now seems to be spreading, even to the Registrars and Inspectors of Poor. I think that this was the cause of so many unaccounted-for cases in last year's Vaccination Report."

MIDLAND DISTRICT.

As regards vaccination, the Examiner states that the working of the Vaccination Acts is carried on in a smooth and satisfactory manner; the generally small number of cases outstanding showing the regularity with which Registrars and Inspectors of Poor perform the duties required or them under these Acts.

At the same time there appear to be in some parishes a very large number of defaulters. For instance, the Inspector of Dalsfelf Parish, who is Registrar of Larkhall District, had 81 cases of defaulters under investigation, and the explanation is that, owing to the migration from the parish on account of the exhaustion of minerals in the district, he has much trouble in tracing defaulters, and, accordingly, keeps the entries open longer than is usually done.

He adds that the "conscientious objectors" are increasing, and that "this tendency will eventually make the administration of the Vaccination Acts an easier matter for Registrars and Inspectors of Poor, whatever may prove to be its effect on the public health." Further, "an inspection of the registers seems to indicate that too large a proportion of those who take advantage of the provisions of the Act belong to a class who are not generally in other respects too solicitous regarding the health of their children, and who, on account of the indifferent housing and sanitary conditions under which many of them live, would be liable to suffer the most severely in the event of an epidemic."

SOUTHERN DISTRICT.

The Examiner says:—"During the course of the year I have observed that there has been a considerable increase in the number of persons in my district who have availed themselves of the provisions of the Vaccination Act of 1907."

"In the case of those parishes visited during the first six months of the year, I am, of course, unable to estimate the number of declarations of conscientious objection applicable to

"children born during 1909, as, at the date of my visit, the statutory period during which a declaration might be lodged with the Registrar had not expired, but the total number of declarations which came under my notice during the course of the year was 1710. Last year the number dealt with was 980, while in the preceding year it was only 434."

"The highest percentage of conscientious objectors was found in the parish of Eddlestone, where there were six declarations in 12 births, and a comparatively high rate occurred in several other rural parishes. In small parishes, however, the presence of a few statutory declarations in a small number of births may occasionally produce a percentage which should not be taken as indicating the normal condition in the country districts."

"Conscientious objectors would again appear to be specially numerous in certain localities, as, for instance, in the Dumfries district, the Border towns (with the exception of Selkirk, where there is a decrease), and the coal-mining districts."

"The following Table indicates the general increase in certain parishes where I have been able to obtain the complete figures for 1909:—

Parishes.	1908. Percentage of Total Births.	1909. Approximate Percentage of Total Births.
BORDER TOWNS.		
Peebles,	4.1	10.8
Galashiels, .. .	36.5	46.2
Hawick,	14.4	23.4
COAL-MINING DISTRICTS.		
Inveresk,	8.5	17.7
Prestonpans, . . .	9.2	16.8
Tranent,	7.5	12.5
DUMFRIES DISTRICT.		
Dumfries,	17.1	27.3
Troqueer,	13.3	30.5
Annan,	15.8	18.4
Dryfesdale, . . .	1.4	19.1
Dornock,	14.8	22.2
Dalbeattie, . . .	6.5	17.2
Kelton,	9.7	12.6

"It will be observed, from the above, that non-vaccination was again most prevalent in Galashiels."

"Conscientious objectors are not so numerous in Edinburgh and Leith as in the above parishes, but the figures for 1909 are far in excess of those for the previous year."

REGISTRARS' NOTES.

1.—NORTHERN DIVISION.

3. CAITHNESS.

43. WICK.—A severe epidemic of scarlet fever has greatly interfered with vaccination in this district.

4. SUTHERLAND.

50 (2). STRATHY.—Statutory declarations of conscientious objection numbered 17, as compared with 4 for the previous year.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Mainland.

596. CARNOCH.—The case entered as unaccounted for is that of the child of a travelling hawker, whom the Inspector of Poor has failed to trace.

Insular.

88. STORNOWAY.—The large number of children still unvaccinated is due to a widespread epidemic of hooping-cough in the parish.

6. INVERNESS.

Insular.

111 (1). NORTH HARRIS.—Vaccination considerably in arrears. Certificates for children who have been vaccinated have in some cases not been transmitted.

113. NORTH UIST.—Vaccination exceptionally well attended to. Only three cases unaccounted for out of 72 surviving children.

114. PORTREE.—Declarations of conscientious objection steadily increasing. I anticipate a still further increase when the provisions of the Act of 1907 become better known among the crofter class.

118 (1). BENBECULA.—A certificate is expected shortly for the only case unaccounted for.

118 (3). BOISDALE.—In this district the time in which vaccination must be performed is extended to twelve months. An epidemic of hooping-cough during the past six months is responsible for the majority of the cases in which vaccination has not yet been performed.

III. NORTH-EASTERN DIVISION.

8. ELGIN.

130. DRAINIE.—Certificates of postponement have been received for the eight cases unaccounted for, but in each case the period allowed has expired.

9. BANFF.

159. KEITH.—It is to be regretted that there is a very considerable increase in the number of declarations of conscientious objection, and I fear that this is likely to go on. I doubt very much if 20 of the 24 declarations are in respect of conscientious objections. The bulk are made to avoid the bother and extra attention required at time of vaccination.

10. ABERDEEN.

168 (2). ST. MACHAR.—The 65 cases unaccounted for include 31 reported on by the Inspector of Poor as "Not Found," 4 cases on which no report has been made, and 30 cases in which certificates of postponement for a period now expired have been received.

11. KINCARDINE.

262. KINNEFF AND CATTERLINE.—I have reason to believe that in some cases an unwillingness to

pay the doctor's fee for vaccination is the real cause of a declaration of conscientious objection being made.

IV. EAST-MIDLAND DIVISION.

12. FORTAR.

232 (5). LOCHEE.—The very large number of cases unaccounted for is to be considered in connection with the great carelessness of parents since the passing of the Act of 1907.

14. FIFE.

426. DYSART.—The cases unaccounted for are more numerous than in previous years. No report has yet been received from the Parochial Inspector regarding list of vaccination defaulters sent him in September last.

V. WEST-MIDLAND DIVISION.

17. STIRLING.

479. FALKIRK.—Declarations of conscientious objection number 523 out of a total of 1192 cases. The matter is becoming a farce.

18. DUMBARTON.

501. OLD KILPATRICK.—A number of the cases unaccounted for are still in the hands of the Inspector of Poor. No report yet received regarding last list of defaulters.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

568 (2). LINWOOD.—The 7 cases in which vaccination is still postponed are all on account of illness. I have personally seen to them.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

681. CRICHTON.—A little delay has been caused by a change of medical officer.

701. WEST CALDER.—Declarations of conscientious objection number 7 more than in the previous year.

VIII. SOUTHERN DIVISION.

32. KIRKCUDBRIGHT.

862. CORSOCK BRIDGE.—There appears to be no desire to take advantage of the conscientious objection provisions of the Act of 1907.

874. KIRKPATRICK-DURHAM.—The case entered as unaccounted for is the child of a vagrant who cannot be traced.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLE
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
2. Orkney.		
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews and Deerness.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
25	St Andrews	Part of St Andrews and Deerness.
26	Sanday	Lady, and part of Cross and Burness.
3. Caithness.		
37b	Keiss	Parts of Canisbay and Wick.
5. Ross and Cromarty.		
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
6. Inverness.		
92b	Cannich	Parts of Kilmorack and Kiltarlity.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
8. Elgin.		
135	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
9. Banff.		
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinness	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
10. Aberdeen.		
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinmonth	Parts of Crimond, Longside, Lomay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick.
222b	Millbrex	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
11. Kincardine.		
266	Nigg	Nigg, and part of Aberdeen.
12. Forfar.		
282	Dundee	Dundee Combination, and part of Mains and Strathmartine.
294b	Kilry	Parts of Glenisla and Lintrathen.
13. Perth.		
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhiddel	Balquhiddel, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenantry	Parts of Blair-Athol and Moulin.
14. Fife.		
402	Anstruther-Easter	Anstruther-Easter, and part of Kilrenny.
417	Crail	Part of Crail, and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton	Part of Kirkcaldy and Dysart and of Markinch.
17. Stirling.		
473	Bonnybridge	Parts of Denny, Dunipace, and Falkirk.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
18. Dumbarton.		
496	Dumbarton	Dumbarton, and parts of Cardross and Old Kilpatrick.
19. Argyll.		
504a	Ardehatten	Part of Ardehatten and Muckairn.
504b	Ardgour and Kingairloch	Part of Ardgour.
505	Ardnamurchan	(1) Parts of Ardnamurchan and of Arisaig and Moidart.
506	Ballachulish, etc. . . .	Part of Kilmallie.
509	Cumlodden and Minard	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. . . .	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie	Parts of Kilmallie and Ardgour.
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardehatten and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
20. Bute.		
556	Lochranza	Parts of Kilbride and Kilmory.
21. Renfrew.		
559b	Bridge-of-Weir	Parts of Houston and Killellan, and of Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
22. Ayr.		
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578	Ayr	(3) Parts of Ayr and Maybole.
584b	Crosshill	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
603	Loudoun	(2) Parts of Loudoun and Galston.
610b	Palna	Parts of Dalnellington, Dalrymple, Kirkmichael, and Straiton.
23. Lanark.		
622	Barony	Part of Glasgow.
626a	Cadder	(2) Parts of Cadder and Glasgow.
626b	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	Parts of Glasgow, Govan Combination, and Rutherglen.
25. Edinburgh.		
685	Edinburgh	Parts of Edinburgh and Colinton.
692	Leith	Leith, and part of Edinburgh.
695b	New Craighall	Parts of Inveresk and Liberton.
698b	Stobhill	Parts of Borthwick, Cockpen, and Newbattle.
29. Selkirk.		
774a	Caddonfoot	Caddonfoot, and part of Innerleithen.
30. Roxburgh.		
787b	Edgerston	Parts of Jedburgh and Southdean.
31. Dumfries.		
813b	Brydekirk	Parts of Annan, Cummertrees, and Hoddum.
830	Holywood	Holywood, and part of Terregies.
853b	Wanlockhead	Part of Sanquhar.
32. Kirkcudbright.		
857b	Bargrennan	Parts of Minnigaff and Penninghame.
862	Corsockbridge	Parts of Balmacellan, Kirkpatrick-Durham and Parton.
864	Dalbeattie	Part of Urr.
33. Wigtown.		
899	Stranraer	Stranraer, and parts of Inch and Leswalt.

		Bressay, . . . 1	Carstairs, . . . 633	
		Bridge-of-Weir, 559		

* The actual number of Districts is 1082—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 18 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

Crawford, . . . 635	Dumfries, . . . 821	Fetlar, . . . 4	Gordon, . . . 742	KEIG, . . . 205
